What's EcoClean all about?

EcoClean is **Ecologic Furniture's** commitment to the health and safety of residence life. We have adopted an antimicrobial silver-based active ingredient that can be incorporated into our laminates and fabrics to help prevent the spread of bacteria, fungi, mold and mildew. Antimicrobial is defined as a state where the growth of bacteria on a product's surface is inhibited.

How does EcoClean work?

Silver Ion Technology – Silver [Ag] disrupts bacteria's metabolism by preventing it from converting nutrients into energy, which inhibits bacteria survival, reproduction and colonization.

What are EcoClean's benefits?

- ◆ **Around-the-clock product protection** from the growth of bacteria, fungi, algae, mold and mildew.
- ◆ **Built-in antimicrobial additives** remain present and active for the lifetime of a product.
- ◆ **Does not wash off or wear away.**
- ◆ **Reduces stain and odor-causing microbes** for fresher and cleaner furniture.
- ◆ **Other untreated objects** within the same environment experience reduced the microbial activities.

Why is EcoClean important?

- ◆ **95% reduction of bacterial activities** in live environment [according to the international standard JIS Z 2801 test-ISO 22196].
- ◆ **Dramatic increase in the health and safety** of your students, faculty and visitors within your institution.
- ◆ **Sustain environmentally-friendly products** for the future.
